

Overview

The CINAHL database on CD-ROM with *Knowledge Finder* provides authoritative coverage of the professional literature in nursing and allied health, and offers you literature access as never before...

- Comprehensive coverage from 1982 to the present, with convenient quarterly updates.
- Nearly 1,000 journals indexed, including most English-language nursing journals, as well as many non-English publications.
- Ten journal subsets (including nursing journals, core nursing, allied health, consumer health, peer reviewed, and major geographic subdivisions) help to narrow retrieval.
- Abstracts available for more than 50% of regularly indexed journal titles, dissertations, educational software, audiovisuals and research instruments.
- Access to all full-text records published in CINAHL.
- Fuzzy logic and Boolean searching make finding documents simple and fast.
- Acclaimed *Knowledge Finder* search software for Windows™ and Macintosh® makes content access intuitive with minimal learning.
- Easy-to-implement network access with *Knowledge Server*® or *Knowledge Host*® lets multiple workstations access the database simultaneously, from CD-ROM or from fast magnetic storage.

Searching

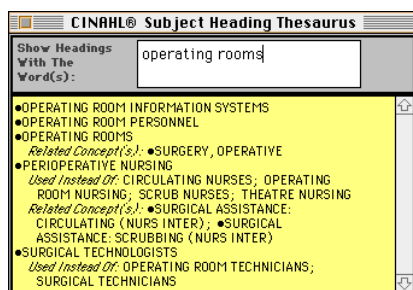

Finding the documents you're looking for is as easy as just typing the few words that you think best characterize the article. *Knowledge Finder's* unique **fuzzy logic** searching uses precise mathematical analysis to judge how closely each article appears to match your search query. And search results are presented in order of likely relevance, showing you the closest matches first, and saving you time reviewing search results.

For precise searching, just click a button to activate *Knowledge Finder's* **Boolean Search** mode. With the traditional Boolean operators, nested parenthesization and truncation, you can fine tune your search to identify the specific article for which you're looking.

Term Dictionaries let you quickly find all articles by a particular author or in a specific journal, as well as providing access by subset, publication and indexing date, publication type, and even citation author name.

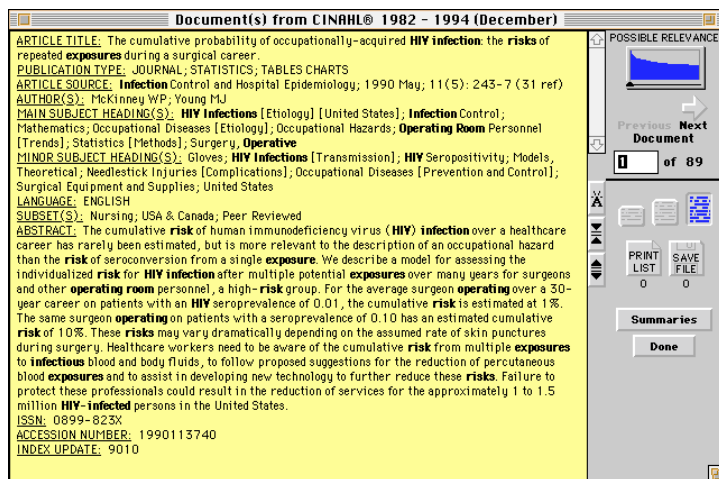

Thesaurus

The CINAHL database with *Knowledge Finder* provides you with a full and powerful implementation of the CINAHL Subject Heading Thesaurus. The CINAHL thesaurus includes many terms from the National Library of Medicine's MeSH thesaurus, including subheadings, explosions and cross-references. In addition, the CINAHL thesaurus greatly enhances the terminology associated with nursing and allied health topics.

Article Display

Retrieved documents are displayed on your computer screen showing the full CINAHL bibliographic record, including abstracts where available.

The documents are presented in order of likely relevance, so you'll see the more focused documents sooner. Many entries also include the original article's bibliography, and you can search the database using the name(s) of cited authors. Documents can be tagged and then printed or exported for use in other programs.

Equipment Requirements

To use the CINAHL database on CD-ROM with *Knowledge Finder*, you'll need a Windows™ or Macintosh® computer:

- For Windows, you'll need Windows 3.1, 95 or NT, an 80486 or better CPU (Pentium recommended, 75MHz or faster) with 16MB RAM, at least SVGA video, a mouse, and a CD-ROM player (faster is better!).
- For the Macintosh, you'll need System 7.1 or later, a color Macintosh (68040 CPU or later recommended) with 16MB RAM, and a CD-ROM player (again, faster is better!).

Knowledge Server® and *Knowledge Host*®, also available from Aries Systems, let you access your *Knowledge Finder* databases in a network environment. Please contact Aries Systems or your authorized *Knowledge Finder* dealer for details.

Subscriptions

Annual subscriptions for the CINAHL database with *Knowledge Finder* are available for both single station and network environments. All subscriptions include quarterly CD-ROM updates, technical support, software updates and documentation (9/15/98).

Subscription Type	Annual Fee
Single workstation	\$1,195.00
Network (1 concurrent user)	1,595.00
Network (2-4 concurrent users)	1,995.00
Network (5-8 concurrent users)	2,650.00
