Fax: (978) • 975 • 3811

## PRODUCT DESCRIPTION

### OVERVIEW

The *DermLine* literature reference service offers you easy, economical and rapid access to the biomedical journal literature most frequently used by dermatology specialists.

The literature references are stored on CD-ROM (Compact Disc, Read-Only Memory) optical data discs. Computer search software designed for Microsoft<sup>®</sup> Windows<sup>™</sup> and the Apple<sup>®</sup> Macintosh<sup>®</sup> lets you search these discs easily and quickly.

Each data disc contains up to 350,000 or more journal article references, selected from the National Library of Medicine's (NLM) MEDLINE<sup>®</sup> database.

### THE *DermLine* DATABASE

The *DermLine* database includes two CD-ROM disc volumes:

**Volume I** contains an archive (updated annually) of all indexed references from approximately 135 dermatology- related journals, and includes material indexed by the NLM from 1966 through 1997. The disc contains more than 850,000 citations.

**Volume II** (for optional quarterly or monthly updates) contains all MEDLINE journal references indexed by the NLM during the current calendar year.

This combination assures you of comprehensive coverage of the current literature, combined with access to the important, recent dermatology literature.

The journals in Volume I include references to articles dealing with a variety of topics, including:

Allergy  
Dermatology  
Infectious Disease  
Leprosy  
Oncology  
Pathology  
Plastic Surgery

Volume I is updated every calendar year, to incorporate new indexing and publishing errata. Volume II is updated and cumulated quarterly or monthly, providing you with convenient searching access to the most recently published materials.

### SEARCHING SOFTWARE

You search the *DermLine* database using the *Knowledge Finder*<sup>®</sup> search system. With *Knowledge Finder*, searching the database can be as simple as typing a sentence that describes what you're looking for.

| Free-Form Topic Search Statement                   |
|--|
| Anesthesia for liposuction in dermatologic surgery |

*Knowledge Finder* uses state-of-the-art retrieval techniques to judge which references are likely to be most relevant to what you're asking for. And the references are presented in order of their **POSSIBLE RELEVANCE** likely  saving you time in the searching process.

The MeSH<sup>®</sup> subject heading thesaurus helps you identify the correct terminology for searching the database.

Article citations (most of which include informative abstracts) are

shown rapidly and clearly on the computer screen.

With *Knowledge Finder*, you don't have to take the time to become an expert searcher. In fact, most users discover that they're searching successfully within a few minutes of their first use of *Knowledge Finder*.

### COMPUTER EQUIPMENT

To use *DermLine* with *Knowledge Finder*, you'll need a PC (model 80386 or later) with Microsoft Windows, or an Apple Macintosh, a compatible CD-ROM player, a floppy disk drive, a hard disk drive, and a printer. Please refer to Aries' *Equipment Specifications* for complete equipment requirements.

You can also access the *DermLine* database in many network environments, using our *Knowledge Server*<sup>®</sup> software. This lets multiple Windows and Macintosh users access a single CD-ROM database concurrently.

Please call us if you have questions concerning hardware configurations.

### SUBSCRIPTIONS

*DermLine* subscriptions are available on an annual basis for personal, institutional and network use.

Each subscription includes a license to use the database disc(s); annual, quarterly or monthly updates of the CD-ROM disc(s); *Knowledge Finder* software with any updates we deliver during the subscription period; comprehensive documentation; and unlimited telephone support.

Please refer to our current Price Lists for subscription rates and shipping charges.
