

Overview

EMBASE Alert on CD-ROM with *Knowledge Finder* provides comprehensive and timely current awareness coverage of the clinical and research medical literature. This publication offers you access to the latest developments in the pharmacological and biomedical literature:

- Comprehensive coverage of approximately 3,500 journals.
- Updated every two weeks, with about 30,000 records added monthly.
- Six-month rolling file provides effective continuity with other retrospective bibliographic databases.
- Content emphasis on drugs and pharmacology, toxicology, human medicine and related biological sciences, psychiatry, public, occupational and environmental health, health policy and management, substance dependence and abuse, forensic science, and biomedical engineering and instrumentation.
- Abstracts available for more than 75% of entries. Many entries also include author keywords.
- Fuzzy logic and Boolean searching make finding documents simple and fast.
- Acclaimed *Knowledge Finder* search software for Windows™ and Macintosh® makes content access intuitive with minimal learning.
- Database delivered on a single cross-platform CD-ROM.
- Easy-to-implement network access with *Knowledge Server*® lets multiple workstations access the database simultaneously, from CD-ROM or from fast magnetic storage.
- High performance *Knowledge Host*® client-server deployment option provides very fast access in both Local Area and Wide Area Network configurations.

Searching

Finding the documents you're looking for is as easy as just typing the few words that you think best characterize the article. *Knowledge Finder's* unique **fuzzy logic** searching uses precise

mathematical analysis to judge how closely each article appears to match your search query. And search results are presented in order of likely relevance, showing you the closest matches first, and saving you time reviewing search results.

For precise searching, just click a button to activate *Knowledge Finder's* **Boolean Search** mode. With the traditional Boolean operators, nested parenthesization and truncation, you can fine tune your search to identify the specific article for which you're looking.

Term Dictionaries let you quickly find all articles by a particular author or in a specific journal, as well as providing access by publication year, publication type and language, author keywords, and database entry date.

Article Display

Retrieved documents are displayed on your computer screen showing the full EMBASE Alert bibliographic record, including abstracts where available.

The documents are presented in order of likely relevance, so you'll see the more focused documents sooner. Documents can be tagged and then printed or exported for use in other programs.

Equipment Requirements

To use EMBASE Alert on CD-ROM with *Knowledge Finder*, you'll need a PC/compatible or Macintosh computer:

For the PC, you'll need Windows (3.x, 95 or NT), an 80386 or better CPU (80486 recommended, 33MHz or faster) with 8MB RAM (16MB recommended), at least VGA video, a mouse, and a CD-ROM player (faster is better!).

For the Macintosh, you'll need System 6.0.7/later (7.5 recommended), a color Macintosh (68K or PPC, 68030 or later) with 8MB RAM (16MB recommended), and a CD-ROM player (again, faster is better!).

Knowledge Server®, also available from Aries Systems, lets you access your *Knowledge Finder* databases in a network environment. Please contact Aries Systems or your authorized *Knowledge Finder* dealer for details.

Subscriptions

Annual subscriptions for EMBASE Alert with *Knowledge Finder* are available for both single station and network environments. All subscriptions included bi-weekly CD-ROM updates, technical support, software updates and documentation. Shipping charges are additional.

Subscription Type	Annual Fee
