

**A R I E S**

### Overview

The *EndocrineLine* literature reference service offers you easy, economical and rapid access to the biomedical journal literature most frequently used by endocrinology specialists.

The literature references are stored on CD-ROM (Compact Disc, Read-Only Memory) optical data discs. Computer search software designed for Microsoft® Windows™ and the Apple® Macintosh® lets you search these discs easily and quickly.

Each data disc contains journal article references, many with abstracts, selected from the National Library of Medicine's (NLM) MEDLINE® database.

### The EndocrineLine Database

*EndocrineLine* subscriptions include one or two CD-ROMs:

Volume	I (Archive Database)	II (Optional Update)
Years Covered	1987 - 1996	1997 Cumulative Year-to-Date
Updated	Annually (in March) - incorporates new indexing and publishing errata	Quarterly or Monthly - provides convenient access to most recently published materials
Entries	733,000 (approx.)	Up to 350,000
Contents	All indexed contents from approximately 220 journals with endocrinology focus/general interest (listed on reverse side), plus topically-related selections from all other 3,800 (approx) MEDLINE titles	Complete MEDLINE contents for current year-to-date, from approximately 3,800 journals (includes all titles in Volume I)

In addition to the endocrinology journals (listed on the other side), Volume I selectively covers related topics, including:

Adrenal	Pancreas	Reproductive
Diabetes	Pineal	Thymus
Endocrine	Pituitary	Thyroid

### Subscriptions

*EndocrineLine* subscriptions are available for Personal, Institutional and Network use. Each subscription includes a license to use the database disc(s); annual, quarterly or monthly updates of the CD-ROM disc(s); *Knowledge Finder* software with any updates we deliver during the subscription period; comprehensive documentation; and unlimited telephone support.

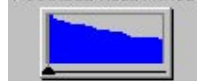

Please refer to our current Price Lists for full pricing details.

### Searching

Finding the references you want is as easy as just typing the few words that you think best characterize the article.

*Knowledge Finder's* unique **fuzzy logic** searching uses precise mathematical analysis to judge how closely each database entry appears to match your search query.

#### POSSIBLE RELEVANCE

Search results are presented in order of likely relevance, showing you the closest matches first, and saving you time reviewing search results.

For precise searching, just click a button to activate *Knowledge Finder's* **Boolean Search** mode. With the traditional Boolean operators, nested parenthesization and truncation, you can fine tune your search to identify the specific article for which you're looking.

The MeSH® subject heading thesaurus helps you identify the correct terminology for searching the database.

**ARTICLE TITLE:** Progesterone receptor content in endometrial carcinoma correlates with serum levels of free estradiol.  
**ARTICLE SOURCE:** Acta Obstet Gynecol Scand (Denmark), Oct 1993, 72(7) p565-9  
**AUTHOR(S):** Nyholm HC; Nielsen AL; Lyndrup J; Thorpe SM  
**ABSTRACT:** OBJECTIVE. To study a possible relationship between serum levels of estrogens and androgens and the tumor content of estrogen receptors and progesterone receptors in endometrial cancer. STUDY DESIGN. Fifty postmenopausal patients were included. Receptors were determined biochemically in tissue cytosol by dextran charcoal-coated assay and immunohistochemically on frozen sections. Serum sex hormones were measured by radioimmunoassays. MAIN FINDINGS. Tumor biochemical progesterone receptor content correlated positively (p 0.05) with free estradiol serum levels. No correlations were observed between estrogen receptor content and any of the serum sex hormones. The progesterone/estrogen receptor ratio,

Article citations (most of which include informative abstracts) are shown rapidly and clearly on your computer screen.

With *Knowledge Finder*, you don't have to take the time to become an expert searcher. In fact, most users discover that they're searching successfully within a few minutes of their first use of *Knowledge Finder*.

### Equipment Requirements

*EndocrineLine* on CD-ROM with *Knowledge Finder* is compatible with PC/compatible and Macintosh computers:

For the PC, you'll need Windows 3.1, 95 or NT, an 80386 or better CPU (80486 recommended, 33MHz or faster) with 8MB RAM, at least SVGA video, a mouse, and a CD-ROM player (faster is better!).

For the Macintosh, you'll need System 6.0.7 or later, a color Macintosh (68030 CPU or later recommended) with 8MB RAM, and a CD-ROM player (again, faster is better!).

*Knowledge Server*®, also available from Aries Systems, lets you access your *Knowledge Finder* databases in a network environment. Please contact Aries Systems or your authorized *Knowledge Finder* dealer for details.
