

PathLine® Biomedical Literature Reference on CD-ROM for Personal Computers (1997 Edition)

Aries Systems Corporation
200 Sutton Street
North Andover, Massachusetts 01845
USA
Tel: (508) • 975 • 7570
Fax: (508) • 975 • 3811

PRODUCT DESCRIPTION

OVERVIEW

The *PathLine* literature reference service offers you easy, economical and rapid access to the biomedical journal literature most frequently used by clinical and experimental pathologists.

The literature references are stored on CD-ROM (Compact Disc, Read-Only Memory) optical data discs. Computer search software designed for Microsoft® Windows™ and the Apple® Macintosh® lets you search these discs easily and quickly.

Each data disc contains over a third of a million journal article references, selected from the National Library of Medicine's (NLM) MEDLINE® database. Journals represented in the database have been carefully chosen by an advisory panel of pathologists.

THE *PathLine* DATABASE

The *PathLine* database includes up to three CD-ROM disc volumes:

Volume I contains an archive (updated annually) of all indexed references from approximately 390 pathology-related journals, and includes material indexed by the NLM during the most recent five prior years (1992-1996). Other pathology articles are also included, for a total of more than 565,000 references.

Volume II (optional) also contains over 570,000 references from the preceding five prior years (1987-1991).

Volume III (for optional quarterly or monthly updates) contains all MEDLINE journal references indexed by the NLM during the current year.

This combination assures you of comprehensive coverage of the current literature, combined with access to the important, recent pathology literature.

Volumes I and II are updated every calendar year, to incorporate new indexing and publishing errata. Volume III is updated and cumulated quarterly or monthly, providing you with convenient searching access to the most recently published materials.

SEARCHING SOFTWARE

You search the *PathLine* database using the *Knowledge Finder*® search system. With *Knowledge Finder*, searching the database can be as simple as typing a sentence that describes what you're looking for.

Free-Form Topic Search Statement
Quality control methods and effectiveness in anatomic pathology

Knowledge Finder uses state-of-the-art retrieval techniques to judge which references are likely to be most relevant to what you're asking for.

POSSIBLE RELEVANCE

And the references are presented in order of their likely relevance, saving you time in the searching process.

The MeSH® subject heading thesaurus helps you identify the correct terminology for searching the database.

Article citations (many of which include informative abstracts) are shown rapidly and clearly on the computer screen.

With *Knowledge Finder*, you don't have to take the time to become an expert searcher. In fact, most users have found they're searching successfully within a few minutes of their first use of *Knowledge Finder*.

COMPUTER EQUIPMENT

To use *PathLine* with *Knowledge Finder*, you'll need a PC (model 80386 or later) with Microsoft Windows, or an Apple Macintosh, a compatible CD-ROM player, a floppy disk drive, a hard disk drive, and a printer. Please refer to Aries' *Equipment Specifications* for complete equipment requirements.

You can also access the *PathLine* database in many network environments, using our *Knowledge Server*® software. This lets multiple computer users access a single CD-ROM database concurrently.

Please call us if you have questions concerning hardware configurations.

SUBSCRIPTIONS

PathLine subscriptions are available for personal, institutional and network use.

Each subscription includes a license to use the database disc(s); annual, quarterly or monthly updates of the CD-ROM disc(s); *Knowledge Finder* software with any updates we deliver during the subscription period; comprehensive documentation; and unlimited telephone support.

Please refer to our current Price Lists for pricing details.
