

RadLine® Biomedical Literature Reference on CD-ROM for Personal Computers (1998 Edition)

Aries Systems Corporation
200 Sutton Street
North Andover, Massachusetts 01845
USA
Tel: (978) • 975 • 7570
Fax: (978) • 975 • 3811

PRODUCT DESCRIPTION

OVERVIEW

The *RadLine* literature reference service offers you easy, economical and rapid access to the biomedical journal literature most frequently used by radiologists.

The literature references are stored on CD-ROM (Compact Disc, Read-Only Memory) optical data discs. Computer search software designed for Microsoft® Windows™ and the Apple® Macintosh® lets you search these discs easily and quickly.

Each data disc contains over a third of a million journal article references, selected from the National Library of Medicine's (NLM) MEDLINE® database.

The radiologic topic content of *RadLine* was developed in cooperation with the Department of Radiology at the University of California, San Francisco.

THE *RadLine* DATABASE

The *RadLine* database includes two CD-ROM disc volumes:

Volume I contains an archive (updated annually) of all indexed references in approximately 195 radiology-related journals, and includes material indexed by the NLM during the most recent ten prior years. Additional references from all other MEDLINE journals are included based upon their topical relevance to radiology, totaling over 521,000 references.

Volume II (for optional quarterly or monthly updates) contains all MEDLINE references indexed by the NLM during the current year.

This combination assures you of comprehensive coverage of the current literature, combined with access to the important, recent radiology literature.

In addition to the general radiology journals (listed on the other side), Volume I includes references to articles dealing with a variety of radiology subspecialties, including:

Abdominal Imaging
Cardiac Radiology
Computed Tomography
Genitourinary Imaging
Head and Neck Radiology
Interventional/Visceral Radiology
Magnetic Resonance Imaging
Mammography
Musculoskeletal Imaging
Neuroradiology
Nuclear Medicine
Pediatric Radiology
Thoracic Radiology
Ultrasound

Volume I is updated every calendar year, to incorporate new indexing and publishing errata. Volume II is updated and cumulated quarterly or monthly, providing you with convenient searching access to the most recently published materials.

SEARCHING SOFTWARE

You search the *RadLine* database using the *Knowledge Finder*® search system. With *Knowledge Finder*, searching the database can be as simple as typing a sentence that describes what you're looking for.

Free-Form Topic Search Statement

Coronal MR images of the temporomandibular joint in cadavers

Knowledge Finder uses state-of-the-art retrieval techniques to judge which references are likely to be most relevant to what you're asking for. And the references are presented in order of their likely relevance, saving you

time in the searching process.

The MeSH® subject heading thesaurus helps you identify the correct terminology for searching the database.

Article citations (most of which include informative abstracts) are shown rapidly and clearly on the computer screen.

With *Knowledge Finder*, you don't have to take the time to become an expert searcher. In fact, most users have found they're searching successfully within a few minutes of their first use of *Knowledge Finder*.

COMPUTER EQUIPMENT

To use *RadLine* with *Knowledge Finder*, you'll need a PC (model 80386 or later) with Microsoft Windows, or an Apple Macintosh, a compatible CD-ROM player, a floppy disk drive, a hard disk drive, and a printer. Please refer to Aries' *Equipment Specifications* for complete equipment requirements.

You can also access the *RadLine* database in many network environments, using our *Knowledge Server*® software. This lets multiple PC and Macintosh users access a single CD-ROM database concurrently.

Please call us if you have questions concerning hardware configurations.

SUBSCRIPTIONS

RadLine subscriptions are available for personal, institutional and network use.

Each subscription includes a license to use the database disc(s); annual, quarterly or monthly updates of the CD-ROM disc(s); *Knowledge Finder* software with any updates we deliver during the subscription period; comprehensive documentation; and unlimited telephone support.
